Here up for sale is our 2012 Audi A5 S Line Cabriolet. This is a 2012 facelift model which is a full S line. It has just hit 48,000 on the odometer and will rise as in daily use. She is very well equipped with the full Audi MMI in car entertainment featuring sat nav, premium sound system, bluetooth phone and music, aux and SD reader. She also has heated leather seats, climate control and 18 inch alloys. The colour combo looks fantastic with the metallic black on black. MOT is up until April 2016 and last full service was around 8 months ago. I am happy to put on a fresh MOT for the asking price. The engine is a real winner with 177bhp from an economic 2.0 diesel. It has the start/stop technology which averages around 54mpg with really low tax too! In terms of its past, it has a full service history with both keys, all original documentation and plenty of receipts from general servicing/ tyres etc. The headlights are full xenon with the daylight running strips and the upgraded LED rear tail lights. The car is free from any damage, finance or mechanical issues and will be carefree for a good while :) I viewed a few A5s beforehand and you can often find many lack the sat nav and sound system, which for me were a must. Come the new year, convertibles will jump up in cost, so grab a great, cared for example whilst its!
