HONDA CBF600 SA-8 Faired Version (ABS), The Honda CBF600S is sporting a detuned version of the current CBR600RR engine and a cast aluminium chassis, the Honda CBF600 is practical, easy to ride, swift, comfortable and thanks to ABS (Anti Lock) brakes as standard, safe too. This model is spot on for new and 'born-again' riders looking for an easy to ride all rounder to help bring on their riding skills. Its low and adjustable seat height will also be a big plus point for the shorter owner looking for a confidence boost. Experienced riders will just love its utter competence in all departments, a fantastic, no hassle package for every day use. This outstanding example is presented in the best selling and most desirable colour-scheme of Pearl Nightstar Black (Jet Black to you and I). As an example this is as good as a used one gets with a huge price differential against the same sort of bike would be new today. The accessories that you see on it have all been fitted by the original and only owner its had from new. It has a pair of R&G Racing's Aero style frame slider mushrooms, a gloss black, rear-wheel hugger to keep the muck off of the back end and a carbon-fibre effect tank protector. We're so sure that you won't be able to find a better example out there for sale today, that we'd be prepared to pay your costs getting to see it if it in anyway disappoints! Our money is that safe! Come on down whenever suits you? We are open 7-days a week throughout the year. Call us FREE on 0800 975.
