nikon d3100 dslr and battery grip with two batterys box discs cables everything that comes in the box ,hardly used and in mint condition, excellent for a child getting into photography ,the camera has no lens ,body only as I am trading up and keeping my two lenses, I'm sure you can find a cheap lens on eBay, with the battery grip you won't be changing batterys all the time the weight and comfort of it makes it comfortable to use and makes it look good, also for the first time user it's not so complicated to use either,fantastic first or second camera bye your side. you will not find another at this price a real bargain I've looke at other sites and I'm well under what others with less are asking. And remote.
