

Natural Collagen for hair, skin and body (45.95 GBP)

Location **London, London**
<https://www.freeadsz.co.uk/x-278243-z>

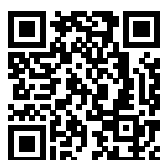

Hair is weakened due to stress, UV radiation and excessive hair styling practices. Healthy hair is bouncy, elastic, supple and the care of such hair is not a problem. In order to strengthen your hair and protect it against the effect of harmful factors, we have used 100% natural oils ensuring maximum nourishment and moisturisation of your hair. Collagen is isolated from fish skin, as helices, at its molecular development stage. It is the only globally known natural set of peptides freely penetrating the epidermal barrier. Collagen is a "youth protein", constituting more than 30% of human protein mass and as much as 70% of skin proteins. Together with elastin, it creates a flexible net in the dermis, which ensures its elasticity and firmness, binds water and lipophilic substances as well as determines the condition of connective tissue, reflecting, in fact, the condition of the whole organism. At the molecular stage our collagen is transdermal, which is a feature not to be found in giant hydrolysed collagen particles, and its structure is almost identical to that of the human collagen.
