<http://www.aegis4training.com/product/abrasive-wheels-training/> Product Description This course is for people who use or employ people who use abrasive wheels for their machines. An abrasive wheel is commonly defined as any wheel, disc, cylinder, or cone consisting of abrasive particles bonded together with various substances. Misuse and mishandling of this material can result to injuries and can even be life-threatening. The perils that come with the use of this material include wheel breakage/bursting, contact or entanglement with running wheel, physical injury from component being ground, noise and dust inhalation. The danger of breakage is intrinsic in every abrasive wheel. According to statistics, nearly half of all accidents which involved this material are due to an unsafe system of work or operator error.
