Bulk SMS sender tool is said to be the next era of text marketing. The tool consists of some finest features that have really changed the image of SMS marketing in the whole world. The software is capable of sending messages to large number of recipients in one go. Users can attach up to 4 cell phones at one time to send messages. The text you are sending can be saved to utilize it in future for a new segment of clients. The tool also produces a log report about the messages sent successfully and the ones that have failed. This gives user a clear message of his reach in the market. The USP of this software is its ability to deliver messages on the numbers that have DND applied on them. In all aspects this sms sending tool is the best of its category. For further details feel free to contact us on: [email]
