We are maxonlinetraining.com, Our HCM / HR training is designed to start with a basic overview of the module and end with advanced knowledge of configuration and testing. In only a matter of couple of months you will be looking for a SAP project. The course is divided into small and easy to understand steps. Each step has lots of hands-on practice exercises. The reading materials / hand-outs make it real easy to recall complex procedures. Participants will get a certification oriented course material and homework assignment to simulate real life projects. The SAP HR training enables managers to effectively manage information about the human resources in their organization. It is integrated with other SAP modules and external systems. From the Organization Management perspective, companies can model a business hierarchy, the relationships of employees to various business units and the reporting structure among employees. THE SAP HCM TRAINING DAY-BY-DAY SCHEDULE The instructor has a study plan for each day of the training. If for any reason the target curriculum can be achieved, then the remaining will spill over to the next day. If this happens on every day of the training, then there might be an additional day of training. Register here to turn your carrier - <https://goo.gl/KC31Ea> Contact us
