Hyundai HY2000SEI 2.2kw Digital Inverter Generator with Key and Remote Start The Hyundai HY2000SEi is the remote and electric start version of the popular HY2000Si model. This is the same as the HY2000Si inverter generator but comes with the added feature of being able to start the unit via a key in the unit itself or from a distance of up to 20 metres with the key fob. This makes the HY2000SEi even more convenient to use and is ideal for camping, boating, caravanning or motorhome trips where you will require power on a regular basis. It's continuous rated 2kw or 2000 watt electrical output is regulated using digital inverter technology. This output is a perfectly smooth sinewave, this means, that this generator can safely power even the most sensitive of electronic and computer based appliances without any danger of damaging the sensitive internal components or circuitry. Featuring an Economy mode, at very light or no load the generator will intelligently lower its idle running speed to just over tickover. This provides you with 2 benefits. Running noise is significantly reduced when there is no power demand or power demand is very low, for example running several incandescent light bulbs. Secondly and more importantly, run time is greatly increased on a single tank of petrol, saving you money. The HY2000SEi can be modified to run on LPG, a convenient feature for those who already use LPG for their camping, caravan or motorhome needs. Complete with 2 keys and 2 remote.
