We are maxonlinetraining.com, we are one of the leading online trainers. we offer datastage and many other courses to learn in online. Our DataStage Certified trainers have both the skills to teach and the industry knowledge to share with you. Most DataStage courses in the marketplace teach you the features of the tool. While this is good, students often struggle to code ETL jobs because they are unable to relate and apply the learning to a real project in the workplace. We have changed the norm. This is the first course in the marketplace that will deliver task-based training. i.e. The course has been designed to teach you to write a job as you would in the real world. At the end of the training you would know the sequence of activities that you would have to follow to deliver an ETL Project.
