

Want to Take Out Prints from Multiple Printers Use Broadcast Printer (41.50 GBP)

Location **London, London**
<https://www.freeadsz.co.uk/x-293495-z>

Broadcast printer is said to be the new face of printing that will give digital printing a hard fighting. The tool consists of some amazing features that make the work of printing easy and effortless. With this software you can print almost all sorts of files like .dco, .xls, .ppt, .txt, html, etc. It can execute PDF files even without the presence of Adobe reader in your system. This broadcast printer can take printouts from multiple printers in bulk. It is also known as broadcast printer and scheduler because of its ability to schedule printing for a different time & date thus giving the user opportunity to take printouts whenever they want. Along with that it has a unique option for automatic printing called 'Hot Folder'. Any document kept in this folder gets printed automatically after a certain time. This certain timing has to be set up by user only. For further details please feel free to mail us: [email]
