Hello! Здравствуйте! :))

I'm a qualified (MA in Linguistics) and experienced Russian language tutor (native speaker)

I would be delighted to offer one-to-one Russian language tuition per Skype to determined learners, who are eager to build up their current knowledge or to start from scratch, and who are committed to achieving a certain level in a very short time, from beginner level to extensive.

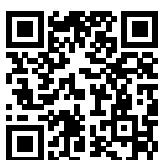

My professional focus is on improving communication skills using fast-track techniques. The pace of my training is intensive and dynamic with focus on developing grammar, vocabulary, fluency and how to use the language in authentic situations

I select a training program individually for every student depending on their level, interests, and goals.

- Active learning of grammar, an extensive conversation practice.
- Creative tasks that will make language learning fun and interesting. You will quickly improve your pronunciation, grammar, speaking, reading, writing and conversational skills.

First trial lesson is free.

I'd be happy to answer any questions you might have
