Integrative Cancer Science and Therapeutics (ICST) is an open access, peer-reviewed online journal interested in attracting high-quality original research and reviews that present or highlight significant advances in all areas of cancer and related biomedical science. The Journal is concerned with basic, translational and clinical research, across different disciplines and areas, enhancing insight in understanding, prevention, diagnosis and treatment of cancer. The journal also prioritizes clinical trials evaluating new treatments, accompanied by research on pharmacology and molecular alterations or biomarkers that predict response or resistance to.
