

Our "Lifetime Warranty" ensures your repair will be covered for as long as you own your vehicle.

VOLKSWAGEN POLO INSTRUMENT CLUSTER REPAIR (1997-2006)
£99

The Volkswagen Polo Dash failure is quite a common fault. On this type of Odometer it is usually caused by internal components breaking down within the Instrument Cluster. The repair is carried out by fully qualified electronics engineers which involves stripping down the Instrument Cluster and replacing internal faulty components to rectify the problem. We do not offer "quick fix" we actually replace the faulty parts with new ones required.. Your mileage reading will also stay intact, so there is no need for mileage correction.

Your VW Speedo can be repaired at a fraction of the cost compared with the price of purchasing a new one. **COMMON ISSUES**

Failing warning lightsSpeedometer problemsFlickering clusterComplete power failurePixels failing on screen

REPAIR PROCEDURE

1. Remove the cluster using the instructions on the website
2. Fill out and print our job form on our web site. If you don't have a printer please write the information in ink, including your name, date on the back half of the box, your reference number and the box number.
3. Seal the form, cut off the address label and secure to the front of the box.
4. We recommend sending via Royal Mail Special Delivery.
5. When you have received the cluster and it has been repaired, we will call you to discuss it via telephone.

WARRANTY AND TURN AROUND

We offer a 24 Month Warranty usually with a 24 hour turn around by post.

If you come to our workshop in Waterlooville (near Portsmouth), we are able to offer a friendly 90 minute fast track service. (Appointment only)
