Bresser Newton 130/650 EQ3 with Tripod and extra accessories. £130 ono  
I purchased this from amazon about 5 months ago, I have no time to use it now that I have my daughter. I have an array of eyepieces 4mm, 6mm, 10mm, 12mm, 20mm and 25mm, 3 barlow lenses, x2, x3 and x5 and a blue moon filter which fits all the eyepieces. It has been well looked after with no damage or marks. I still have the original box and it is currently packed away to prevent any damage to it. I have spare batteries for the LED view finder. I also have a camera mount for this so you can take pictures through the eyepiece. I am sorry to have to sell it but needs must. I am in high brooms. More specific details can be found on the bresser website and amazon.;
