Experience a new way of biking with the Viking E-Advance Electric Mountain Bike, helping you pedal further with less of the strain of a normal bike.

- Viking adeptly transverses state of the art technology with classic mountain bike design to introduce their newest 2015 Electric Mountain Bike
- The main objective of this bike is to join these two principles: the ability to ride rougher terrain and the ease of the new Pedelec electric system.
- The bike has an ON/OFF switch button on the handle bars to give you that boost when you need it. That is the pedelec system. In the past cycling up hills was a rider's worst nightmare; now you can press a button and you will get the power assist you need to go up that hill.
- It features a brand new lithium battery that is light, discrete and looks like a water bottle. It's unlocked and removed in seconds allowing you for effortless charging and storage.
- It charges in 3-4 hours and you can charge it on or off the bike.
- This bike will take you around 20 miles in one full charge ( mileage dependent on weight of the rider and terrain covered)
- 7 speed shimano gears
- Front and rear lights.
- All Viking Bikes are guaranteed with the on-hand support of our service team.
- Max user weight 110 kg
- White: 17"
