We see 'WHICH' adverts about how they can help you understand the powers and pitfalls of your home and work computer with a simple manual- but the manual ends up being difficult to understand on your own without the benefit of an experienced person who will look over your shoulder as I guide your keystrokes to assure that you will get all the benefits of home or business computing without any misunderstandings that may lead you to tick the wrong key - and then perhaps lose a file, letter, email, causing you to start over again.

You have to keep your computer free of 'invaders' (viruses, spammers, spyware, ad-ware, malware and just unsolicited pressure to say 'Yes' to stuff and offers you didn't log into your computer for.

I will guide you through the initial process of getting to know your computer and the amazing things that it can do for you...Then I will show you how to secure your computer and all your personal details in a cocoon of security so no intruders can get in and steal your info.

Though I lead an established partnership of business & social media professionals, our interaction will be one-to-one with NO sales-pitches for any other services or software unless you or your business specifically asks for them.

I will show you how to understand and use the social networks (like Facebook, Twitter, LinkedIn etc.) to make you and your business more powerful and talked about...or just to keep up with family stuff.

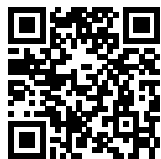

The local family or business person seems always puzzled by all the features, offers and pitfalls that their computer system comes with...but with us...with me Masi Alessandro (you can Google me), you can operate that powerhouse at your fingertips supported by power and safety.

Get in touch....no problem is too small....and my rates are the lowest in the.
