Welcome to Duotech electronics projector repair service

if we can repair the malfunctioning parts of your projector without having to fit any new parts then duotech is the company for you. we are proud to say that no other companies can compete with our specifications. our trained technicians are able to perform the most sophisticated repair jobs on projectors, at a fraction of the cost of a full replacement unit.

we can repair any projector brands including: epson, canon, casio, optoma, sanyo, sony, panasonic, hitachi, sharp, and many more.

we can identify faults and repair projector parts such as:

lamp problems - lamp not lighting, replaced lamp still not working, and more.

image problems - image not square, black bars, noise in image, and more.

input/signal problem - image only on projector or laptop, remote mouse not working, blue screen, and more.

if the broken parts of your projector are beyond repair and we have to order and fit new parts, the cost of repair will be our standard fee plus the cost of the new parts.

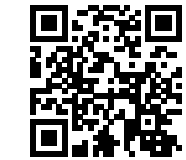

once we have received your projector a technician will carry out an inspection and test the machine's

electronic components to locate the problem, once the initial inspection and testing has been carried out the technician who is working on your machine will contact you by telephone to inform you that repair work has been done to the machine. if the machine requires any new parts, the technician will let you know what the parts are and while you know what the total cost of the repair bill is, we will be any work.

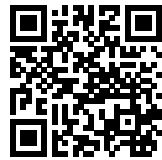

if you are satisfied with the cost of the repair, we will proceed with the work and order any new parts that may be required. our technician will give you an estimate of how long he expects the repair to take and when you can expect to receive delivery of your machine. once the repair has been completed, your machine will be fully tested once more to ensure that everything is working correctly. when the technician has completed the testing, duotech will contact you to arrange a suitable time and location for delivery.
