MSI 10.1 widescreen, Mini Laptop; "comes with External 15.1" flatscreen Monitor, pictured" The 10.1" screen on the laptop is broken with cracks, and a little worse for wear; but still functions when connected to an external Screen; like the one included, though it will work with a widescreen ext monitor too; if you already have one?. please note, comes without battery; needs a new one; still works fine on mains with adaptor; comes with built in "System Restore" on a partition of the HD, which is approx 120gb in total; 1gb ram; LAN socket, wi-fi, x3 USB sockets, Ext Monitor socket, and audio out mini jack; tested over an entire week, and functioning without any hitches or glitches.. except some hassle getting Wi-Fi set up; would do as a backup machine if your main goes down; See pics for more detail, could deliver locally if.
