

# Cambridge Audio 851C CD Player and Atlas Itegra audio interconnects (800 GBP)

Location

South West, Gloucestershire

<https://www.freeadsz.co.uk/x-322902-z>

Cambridge Audio's flagship Cd player and preamp including Atlas Integra audio interconnects. Both What-Hifi 5 star award winners. Incredible detail and clarity. Easily one of the best Cd players I've ever heard. The player also doubles as a preamp/headphone amp and has many useful connections including optical for running a television through for example and USB or VGA for Pc's. One year of extremely light use, I am selling because I have moved away from physical media. This player an essential for any consumate audiophile normally retails at £1200 and will breath new life in to any system, the perfect gift for any hifi buff or anyone with.
