The latest generation CBF1000 F ABS, Honda have improved on an already winning formula by making the bike more efficient, Smoother to ride and more pleasing on the eye. An adjustable screen and a better combined braking/ABS system mean this 'king of all rounder's' can still cut the mustard. Honda claim the newly fuelled engine is now 7% more efficient than the old bike; it's easy to see fuel figures of 50mpg and more. The detuned 06 fireblade engine isn't going to set the world on fire but its incredibly flexible, smooth power delivery and has enough grunt for two up touring and will send the new speedo past the 140mph.
