I've got the experience. I'm into programming for the last 10 years

I'm ambitious. Until the beginning of 2009 I have successfully implemented almost 150 internet websites, internet shops, and other e-commerce projects.

I will never do all the things on my own. I'm matching the right person with the right project and I'll coordinate all the process, so everything goes smoothly.

I think that „Client is NOT always right". I'm treating your satisfaction as priority and therefore sometimes I may have different opinion.

I respect your time and money. I am only interested in well done job and always stick to projects deadlines.

Each project is unique, requires different resources and people involved, so I encourage you to email me in order to receive a no commitments valuation.

Websites

Each of my website creations involves a precisely planned set of actions. I'm proud of doing very good websites, because each of them is thoroughly though over and balanced. There's no place for unnecessary applications and functionalities. They are aesthetic and attract customers. They also: Are SEO optimized – it will be easier to google them Have modern graphics created especially for the customer Are Responsive – you may easily view them on desktop, tablet or mobile phone Are CMS based, which means client can edit and develop his website on his own, with no limits to subpages Include Contact form and Map Can have individual functionalities adjusted to customers needs (like order forms, reservation systems, products catalog, catalog, landing page sions etc.) Come with 6-months guarantee

Online shops

I'm offering to my clients creation of modern, intuitive and functional online stores, which by many, are considered some of the best e-commerce solutions on the market. To be precise, I'm creating the business websites, which my business partners need. These internet shops: Are SEO optimized Have got modern graphic design created especially for the client Are Responsive Are Based on Open Source licence, thanks to which your store can be expanded easily Have no monthly commitments, no product limits, Shop will be installed on customer's server (it's fully his property) Can be integrated with payment systems, courier systems and warehouse management software Can use multiple currencies and

multiple language versions Come with 6-months guarantee
Internet systems

Depending on customers needs, I can create some non-standard systems for business automation, for instance: Hotel/central reservation systems (CRS) Warehouse management systems (WMS) Other integrations Order forms I'm helping you with management. When you don't know how to move in control panel, change or add something on the website, it's enough to contact me. I'll send back a screenshot with relevant information. I won't leave you on your own with the website after getting paid. If you've got any issues just write to me, and we'll sort out your problems.

Contact me now!

If you're looking to have your website done professionally I'm waiting for your email. Please provide me with your requirements in regards to the project, and I will reply with valuation tailored to your.
