MERCEDES BENZ W210, W202, W208, E, C & CLK INSTRUMENT CLUSTER REPAIR (1997-2003)
£99 The Mercedes Benz W210, W202, W208, E C & CLK Dash failure is quite a common fault. On this type of Odometer it is usually caused by internal components breaking down within the Instrument Cluster. The Mercedes repair is carried out by fully qualified electronics engineers and involves stripping down the Instrument Cluster and replacing internal faulty components to rectify the problem. We do not offer "quick fix" we actually replace the faulty parts with new ones required for the Mercedes. Your mileage reading will also stay intact, so there is no need for mileage correction. Your Mercedes Speedo can be repaired at a fraction of the cost compared with the price of purchasing a new one. COMMON ISSUES Failing warning lights Mercedes Benz Speedometer problems Flickering Cluster Complete power failure Pixels failing on screen REMOVAL INSTRUCTIONS Mercedes Instrument Clusters are pressure fitted (they are not screwed in). Usually you can just pull them towards you by holding the sides or you can use a Mercedes hook or trim tool to pull it forward. Once forward you need to unlatch the two plugs on the back and remove from the car. REPAIR PROCEDURE 1. Remove the cluster using the instructions on the website 2. Fill out and print our job form on our web site. If you don't have a printer please write the information manually including your post code on the outside of the box for our reference. 3. Sign the form, cut off the address label and secure to the front of the box. 4. We recommend sending via Royal Mail Special Delivery UK 5. When we have received the cluster and have repaired it, we will call you for payment via telephone WARRANTY AND TURN AROUND We offer a Lifetime Warranty (T&C's Apply), usually with a 24 hour turn around by post. If you come to our workshop in Waterlooville (near Portsmouth) we are able to offer a friendly 90 minute fast track service. (Appointment only) CONTACT
