

CHEAP Great Gaming PC Set up (300 GBP)

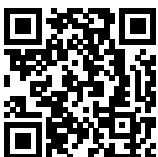

Location

South East, West Sussex

<https://www.freeadsz.co.uk/x-332455-z>

Computer Specs: AMD Athlon X4 860K Quad Core Processor, 8GB GDDR5 RAM, AMD Radeon HD 7700 Series Graphics Card, 1TB HDD, Windows 8.1. Built this PC last year as a bit of a project and loved it so much it became my primary PC. It cost £500 for the computer parts alone, which I'm now selling with a great quality 22 inch Acer 60hz monitor. The computer is great for gaming, I primarily play League of Legends and can run it on high settings with over 100 FPS (frames per second) at all times. It runs almost any game to an okay standard, although newer titles wont be able to run at ultra high settings etc. I'm happy to throw in my Steelseries keyboard with white back lighting and Razer death adder mouse for an extra £20. Please bare in mind the mouse is built for left handed use but feels perfectly fine when gripped with right. Both are used and work fine. The keyboard has a small hairline crack on the spacebar which isn't noticeable. Feel free to contact me with any questions, emails will be replied to within an hour usually! Grab a bargain! ;
