Great little electronic drum kit. Sound is very good for something so small and portable. All pads can be programmed to different sounds, and there are many to choose from, as well as a large number of preset kits. Comes with 2 pedals, one for "bass drum" and one for "hi-hat" although, again, these can be programmed to different sounds. Complete with power supply and original instruction manual. Will throw in a pair of sticks too! Although it will never beat the sound of a real drum kit, it has a number of advantages - easy to carry around, very quick to put together and dismantle and has a volume control and headphone input! Excellent for practising at home without annoying the neighbours and the rest of the.
