Beefsteak tomatoes, aptly named for their large size and meaty texture, have a classic tomato flavor, however, depending upon the variety, they can also be sweet to the taste. They are heavy, reaching weights as high as four pounds, and they range in colour from pink, to vibrant red, to orange. Most are smooth in shape, although there are a few ribbed varieties, such as Red Ponderosa and Coustralee. When growing tomatoes, there are two main distinctions in the plant itself: determinate v. indeterminate. Determinate tomatoes bloom and set fruit all at once and then decline. Their blossoms grow at the ends of shoots, thus stopping growth and determining their length. Indeterminate tomatoes continue to grow and to produce tomatoes throughout the summer because the flowers grow along the vines rather than at the ends.
