We are good at bringing one commodity that's increasingly rare in today's business environment – passion. We're truly passionate about hardwood, and during years in this business we've developed an unrivalled understanding of how to bring out the very best in a hardwood floor. Our skilled craftsmen are trained to the highest standards and we ensure that the results in the end will be excellent! The process starts with assessing the damages and continuing with repairs as required before the floor is sanded down. Second, the floor is sanded until all the original finish is gone, wood filler is applied and floor is buffed until smooth. After that the stain is applied or the natural wood colour is retained. In the end the floor is finished with coats of polyurethane or water base finish in choices of satin, semi-gloss or high-gloss. Contact us for more information or to book an assessment.
