The R1150GS, the bike that is responsible for kick starting the big enduro market into life. A few minutes in the saddle answers the question "why are these so popular?" The size and weight dissappears in an instant, they handle so much better than you would ever think possible. This bike is an absolute gem, its only covered 40k which for the air cooled boxed twin is insignificantly low, these are bikes that hit 100k and keep marching on without a second thought. It has been used but cared for, with no dents or scrapes. The standard exhaust has been replaced with a Remus end can which is both lighter and more aesthetically pleasing. We have some service receipts including a valve service carried out at 34000 miles, as well as all the old mot's. There are many extras fitted to the bike inclduding engine bars, spot and fog lights, it comes with a tank cover which we removed to show the condition of the tank. It has heated grips, two screens, 3 racks including one for a large roll. It has genuine BMW panniers and BMW hand guards. As with all our bikes it is of course HPI clear and will be fully prepared by our workshop prior to collection. Part exchanges are very welcome as we are always looking for used bikes, we are also happy to settle or arrange finance and trade up or down. £3695
