According to a study conducted by UK's renowned energy supplier First Utility says Customers of the BIG SIX energy companies are overpaying around £4 billion because they are still going with expensive energy tariffs. Households are paying on and average £293 more on their gas and electricity bills which is an increase of 25% compare to previous year. Brits living in the East Midlands and East of England were overspending the most, with an average £310. First Utility also said that 70% of households who are overpaying on energy bills are on the most expensive standard variable tariff. The only thing people should do is to shop around, get a cheap energy quote from price comparison website like FreePriceCompare and simply switch the supplier!! Other than Big Six Energy companies, there are 40+ energy companies in UK. All these companies are serving households and businesses by providing a simple and easy to understand tariffs which are cheaper sometimes compare to Big Six energy tariffs.
