Yorkshire and the Humber, West Yorkshire

New Comfort Lining Thermoplastic Denture Adhesive EX Thermoplastic denture adhesive allows you to eat with no pain as the thermoplastic protects your gums against your dentures adding that cushion between your dentures and the gum area. Paste adhesives have to be changed every time that you want to eat, or they can slide off and become slimy by mixing with your food. Thermoplastic denture adhesives will last up to one week with just one application, they stay adhered to your dentures without applying more product. For more details on Comfort Lining, visit our website <http://www.comfortlining>
