- PC repairs.
- Windows install or upgrade.
- Program installation or uninstallation.
- Hardware upgrades.
- Data recovery.
- Virus, Adware, Spyware, Malware, Junk Removal and Clean Up
- Custom PC building

PC running slow? PC slowness can be caused by many factors such as:

- Hard drives reaching max capacity (lack of storage)
- Lack of RAM in system.

• Annoying pop-ups when searching taking up valuable RAM space

• The use of its semi-proprietary HDDL

And no other factor is really a good element of the OS software and hardware improvements.
