End of Tenancy Cleaning Service / Deep Cleaning Every house needs a Deep cleaning at least once per year. Even if you have a regular cleaning service some places in your home require more attention. Our cleaners will come to your property and clean behind sofas, cabinets and carry out a deep clean of your kitchen and bathroom.

In addition to our standard cleaning services, we are able to provide a host of additional services that are only available upon request, as part of our deep cleaning service. Things that we only do for clients who have requested a deep cleaning/ end of tenancy cleaning service, and not just a regular clean are: Wiping and dusting everything - including light fixtures, skirting boards, doors and door frames, sockets and switches. Cleaning inside and out of emptied fridges and kitchen cupboards. Moving furniture in order that we can clean or vacuum underneath. Changing bed sheets.

The deep clean includes all of the same services that are included in the regular clean, as well as those extras listed above. They are highly recommended for those that have just moved home or are just about.
