We are perfectionists and have years of experience at treating commercial and residential wooden floors across Hounslow as they deserve. The process begins with examing the damages and before the floor is sanded down we are proceeding with repairs as necessary. The floor is sanded until all the original finish is gone, wood filler is applied and floor is buffed until smooth. Our state of the art sanding equipment ensures minimum dusting. After this point the stain is applied or the natural wood colour is retained. Finally, the last part is application of a wide range of floor finishes including stains, oils, waxes and lacquers. We believe that each wooden floor has its own unique character and we use advanced, dust-retentive sanding machines to release the fresh wood before applying a range of eco-friendly stains and varnishes to finish the work off.
