

Yellow and Black Labrador Puppies (900 GBP)

Location **South East, Surrey**
<https://www.freeadsz.co.uk/x-351191-z>

We have a mixed litter of both black and yellow puppies. The mother is our beautiful black Kennel club Registered Labrador bitch. She is a lovely gentle girl, fantastic with children and other dogs and very obedient. She is 2.5 years old and this is her first litter of pups. She has had very good results for her hips tested by the British Veterinary Association at 5/3 and elbows also tested at 0/0. She also has a clear eye certificate. The father is a stunning yellow boy. He has an excellent Pedigree and he has very good results for hips tested by the British Veterinary Association at 5/4 and elbows also tested at 0/0. He also has a clear eye certificate. He is also been DNA tested clear from Centronuclear Myopathy (CNM), OptiGen prcd-PRA, Dwarfism /Skeletal Dysplasia 2(Osteochondrodysplasia), Exercise Induced Collapse (EIC) so that means that his offspring cannot be positive for these problems. The pups have been raised in our family home with children and all of the usual noise of family life. They will be ready to join their new families when they are 8 weeks old. They have already been vet checked and will be checked again just before they leave - at the same time as they have their first vaccination and their microchip. They are wormed every 2 weeks, alternating Panacur with Drontal puppy.
