I have a beautiful 1968 ford mustang coupe for sale. I bought her while I was staying with my boyfriend in America. I used her as a bit of fun to cruise around Vermont in over the summer months. She originally came from New jersey and a young guy bought her while in New York and drove her all the way back to Vermont which is a 8 hour journey on a good day. She was then used as a fun weekend cruise around and left for months on his drive. I bought her unrestored needing work, but she's an old girl so you wouldn't expect any different. But to buy as a project would be perfect because while you work on her bit by bit you can still have some fun with her around the roads. She catches eyes still even though she needs some tlc. She needs a new exhaust, I had to take the old one off by the time it came to wrapping her up for the winter. She also needs some welding work in the back of the trunk so needs some patch work doing or some new half quarter panels which is common on these cars but inexpensive and easy to fix. She lastly needs some new carpet interior and headlining and a paint job. I have started to sand off by the front frame work and fibreglassed the patch which needed doing. From doing this her original colour was actually cream and after had the red mustang colour done. She is a straight six engine which is a really beautiful engine and actually becoming more rare in these cars because so many are ripping them out for a V8 instead. She's also automatic transmission. She's very much loved by me but I have other commitments now and I would love to see her with a brand new makeover she so deserves. She's still currently in the states but is been shipped in the next 3-4 weeks. And her name is Genie I had valued by the DMV which the American DVLA and they said in the condition she was worth 8k in pounds. But I would take the nearest offer and please don't send me stupid offers even with the condition these cars are worth quite a bit.
