LeMANS 4000 slot Racing car set 1970's issue 00/HO scale. Boxed. This needs a little TLC to bring back to racing condition.

The power transformer works, as do motors on both cars and headlights on the Porsche. The tyres are perished so not currently possible to race the cars. I have seen spare tyres for sale on e-bay. I also needed to apply a little pressure to the front of the cars obtain pick-up. This could be due to the tyres not generating enough pressure or the track contacts needing a clean up, so it does still need a little TLC to get racing. There are multiple track configurations as seen in the.
