Projectors We stock a range of LED Full HD Projectors for daily and weekly hire ideal for use with video, or powerpoint projection. At South East Design we use these projectors along side our laser shows for a full lighting and image show, creating a stunning display. Our projectors are easily transportable, ideal for quick set-up and presenters on the move. We stock a range of the latest video projectors for hire that will accept many inputs from many of today's electronic devices. All hire projectors are available for collection from our warehouse or we offer full delivery and installation of hire projectors at venues around Sussex & Kent, and can be used for conferences or meetings. Lighting Design A Specialist company in the art of lighting and special effects for any Situation be it a store promotion, car launch, external public event and is also well known for its use of scanning or moving lighting, including search lights. In some situations the company has been asked to make either a lighting effect or a stage prop just for a one off show or for some clients the ability may not be in place or the cash flow to be able to make props for their shows, so this is where S.E.D comes in. The company has also used its abilities in projection and art design to project a clients idea onto large screens in theaters and halls to give that extra illusion to there audience. Also in this area the company built from scratch a projector to rotate a clients logo onto a large internal wall for a show room opening, all this was done in conjunction with a laser & light show all put to music.

Let us see if we can put your ideas into practice. Special Effects. The director being an electronics engineer as well as having a flare for graphic design and a fantastic indoor team S.E.D has put together some amazing special effects for both indoor and outdoor events. We have covered fashion shows, photo shoots, small and large stage productions, company conferences and many outdoor sound and light shows. We have wowed audiences with our pyrotechnics and projection

images and built everything from a 13 foot man for a fashion show to a projector that rotated a company logo. The company has also been used for a magic show to show a magic river, a river of light and a wolf doing a magic trick, a magic making a sheep that had to be a footballer or a dog to the street light. Laser shows at S.E.D. are a special effect and laser light show and in 2010 we added a new laser to this show. We have small party lasers (50 Mw Green / 100Mw Red) that can be used for small halls and productions as well as interesting lighters. These can fire up to a thousand beams creating a firework effect. We then have our new Green text laser (including over 50 built in patterns) this comes with a key board for you to type in messages and company names. Ideal for promotional events and venues up to 100 people if using the patterns. Full RGB 15 watt (1500 Mw) lasers these powerful lasers are fully programmable with animation as well as beam effects. The only limitations with this unit is your imagination. Comes with full show software on a laptop. We can do a standard show using images already in the laser plus pre
