I bought in January this year, however due to new commitments I have no time to play and am looking to sell. It has not been used since February so is in excellent condition, and in full working order. It comes with Call of Duty: Black ops 3, Star wars Battlefront, 1 controller and all the other wires that were in the box when I first bought it. I'm open to any sensible offers, however please be aware I paid almost £300 only 6 months ago, so the advertised price is already very reasonable in my opinion. ;
