Suunto Advizor with two hr chest straps-£80-Sheffield Would consider gear swap or gear and cash deal .. in good condition and all working apart from some cosmetic marks and minor marks on the bezel. manual with watch. Suunto Advizor with its unique combination of features has been designed to accompany you in the most demanding outdoors conditions. The altimeter, barometer, and electronic compass equip you with information necessary to make responsible decisions enabling safe movement in the great outdoors. In addition to its superb features for moving in the field, the Suunto Advizor functions as a personal trainer for even the most demanding athletes and health and sport devotees. The heart rate monitor can be utilized in target zone training by setting the upper and lower limits for your heart rate, and notifying you when these preset limits are exceeded, with audio and visual alarms. The altimeter in combination with the heart rate monitor keep track of the impact of altitude and vertical rate of movement on the heart rate when moving outdoors. Suunto Advizor also stores crucial information for later viewing: Training time, maximum, minimum, and average heart rate, as well as time spent in, above, and below the target zone during training. The Advizor Watch by Suunto. Rugged outdoor heart rate monitor for adventurous hikers and climbers.
