About Ez Sys Ltd

## IT Technical and Consulting Service

Ez Sys Ltd is an IT Technical and Consulting Service. We have chosen to take our knowledge and experiences and come together to deliver enterprise class solutions to the small and medium sized businesses. We measure our success by our ability to provide businesses and organizations with high quality solutions that satisfy their information management related needs. We analyse your business needs to identify benefits of an IT system. We translate these business needs into detailed technical specifications and then into practical, real-world architectures which exploits technology to deliver real benefits. We also help manage your development project or system procurement to ensure that it successfully delivers the planned benefits, on time and to budget.

Our general service as following:

1. Installs, monitors and supports internal/external networks, servers, email, database and security systems;
2. Analyses performance and makes recommendations to improve reliability, usability, security and other aspects of system performance;
3. Identifies problems, agrees remedial action and undertakes emergency maintenance if required;
4. Acts as a liaison between user, outside suppliers, and other technical teams;
5. Provides guidance to users on hardware, software and network operations;

6. Develops and maintains site administration documentation and configuration records.
