Grab your Nikon D7100 Digital SLR camera and hit the park, the trail, or the city for some cool shots. This classy camera boasts a 24.1 MP DX-format image sensor, which means that you should be able to achieve an incredible level of details. As a bonus, the camera can shoot up to six frames per second, taking up to a hundred continuous shots, so if you are rushing to capture a moment, you have the luxury of snatching as many shots as possible. Then, you can go through them later to pick the right one. As if that was not enough, the Nikon D7100 camera also shoots 1080p videos, with full-time autofocus to keep everything clear and an onboard mic to collect the audio.

**Product Features**Capture every detail true to life

The D7100 marks an exciting advancement in image quality for high-resolution DX-format cameras. Nikon specially designed its 24.1-megapixel DX-format CMOS sensor without using an optical low pass filter (OLPF), resulting in the purest, sharpest images using D7100's DX-format CMOS sensor. Speed and precision in harmony  
 When the action speeds up, fire a blazing fast 6 frames per second continuously for up to 100 shots. Building on the acclaimed autofocus system from the D300s, the D7100 uses 51 focus points, including 15 cross-type sensors for detecting both vertical and horizontal contrast variations, to achieve fast, precise focus. The central cross-type sensor works all the way down to f/8, a huge advantage when using compatible teleconverters. At the same time, a highly accurate 2016-pixel RGB sensor evaluates every scene, taking into account brightness, contrast, subject distance and color, for spot-on auto operations like Face-Priority and full-time autofocus during video capture. Create movies that amaze

With full-time autofocus and manual exposure control during video recording, a built-in stereo microphone and optional stereo microphone jack, the D7100 has everything you need to produce high-quality, DSLR-quality video. Dual ISO slots give you additional resolution, and the 1080p HD video can be shot in 1080i or 1080p. The D7100 also has a built-in LCD screen that can be flipped out for shooting from the back or side.
