New product! Comfort Lining Thermoplastic Denture Adhesive Just imagine not having to change out your denture adhesive every few hours and a denture adhesive that will last up to a week with one application! Comfort Lining denture adhesive was created on the concept of the discontinued product called Cushion Grip thermoplastic denture adhesive. By heating up the aluminum tube in hot water for five minutes you get a soft pliable reline without all the harsh chemicals and strong aftertaste. Visit our website for more information <http://www.comfortlining>
