Weight Loss Tips With Chlorogen 800
 Eat Plenty of Fruits and Vegetables - They help you feel full. And of course, they're good for you too.

Drink Water - Studies show a link between water consumption and weight loss. In one study, participants who drank water before each meal took in 75 fewer calories. That's 8lbs a year.

Banish Comfort Foods - Get them out of the house. Banish them - just have them gone completely so you're not tempted for a late night binge session. Take 'comfort' in knowing that you'll soon look awesome.

Eat Only With a Plate at the Table - Those Dorritos you scarf down in front of the TV are a waist-buster. So is the ice cream while you chat on Facebook. Eat on a plate, at the table, and you're in better shape to stay lean.

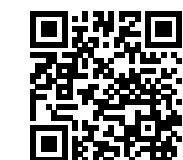

Keep a Food Journal - Write down everything you eat and your mood at the time. The simple act of

recording what you eat keeps you accountable to your goals. You'll also see patterns between what you eat and how you're feeling. When you do, you can expect to see an extra 10lbs extra.
