Hi there. Here I have for sale my lappy due to a new desktop I bought recently. The laptop was bought from pcspecialist website about 2 yrs ago. The model is Optimus 2. It's a mid to high end gaming machine. I was able to run these games reaching the following FPSs:

- The Witcher 3: All Medium 35-40 FPS
- GTA 5: Mixed medium and high 40-50 FPS
- Total War Warhammer: All medium 40-50 FPS

You can run almost every game from 2013-2014 on high/ultra with no doubt.

Laptop is in great working order- no overheats, no screen freezing, everything works smoothly and faultlessly. It comes with freshly installed Win 8.1 64bit with the option to free download Win 10 until 29/07. Battery is like brand new- lasts about 3 hours. There are some cosmetic signs of wear and a long scratch on the lid, as you can see from pictures. But the price, compared to the components you get is the best one in Gumtree!!! Here is a detailed specs:

- Chassis & Display Optimus Series: 15.6" Matte Full HD LED Widescreen (1920x1080)
- Processor (CPU) Intel® Core™ i7 Quad Core Mobile Processor i7-4710MQ (2.50GHz) 6MB
