

# Mercedes CLK320 2004 Cabriolet Convertible Silver Designo Long MOT (4,250 GBP)

Location **London, London**  
<https://www.freeadsz.co.uk/x-405989-z>

When I took the photos last week the car still had my personal number plate on. This is now removed and has original number plates starting GU54.

DESIGNO - offers refinement and individuality. Exotic colours in paint, leather and interior trim are crafted with a personal touch. This car is really individual. A lovely car, I am only selling as I have moved to a house where I need to fit 2 cars onto the driveway so I will have to sell this and buy a smaller car.

It is described as silver but it is more like a champagne colour. Looks stunning. The woodwork is so impressive. Very reliable and comfortable to drive. This car had every extra offered. Its got it all. I have the datacard which shows all the extras, if you would like photos of this please email me. I am told the first owner was quite high up in Mercedes and this was made to his specification. Since then it belonged to one other lady driver apart from myself.

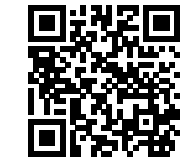

I recently had a Halfords MAJOR service and MOT on the 7th of June 2016. I have kept any receipts including the previous owners and have the service history (not all Mercedes). Services: June 2005 Miles 6171, Nov 2005 Milage not recorded, Feb 2007 Miles 21972, Dec 2008 Miles 35513, Apr 2010 Miles 45483, July 2011 Miles 55496, Apr 2013 Miles 65501, May 2014 Miles 70134, May 2015 Miles 74861, June 2016 Miles 79555.

The car has been looked after over the years. I am only the 3rd owner. It is low mileage for its age. Bodywork great for its age. It has been used as a second car and has been covered throughout the winter. (I will include the cover which was recently replaced) The interior in my opinion is almost perfect. Bad bits:

The central locking only works by holding the key to within an inch of the lock. It will not lock from a button. I bought a new key so it does not have a display which is a spruce. The metal is not as I expected that missing the keys it is a bit of a pain. There is a small dent on the back of the side window. I have just noticed in the photos that I have one of my hair bands on the gear stick. This is not there for any reason apart from when I put the roof down and need a hair band.
