I purchased this car after passing my test, as I wanted a small car to start off with. This really is a nice car to drive. It does have a slight dent and some scratches and things from the previous owner, but the dent could easily be pushed back out. It recently had a full service and a new sump pan, as the old one was leaking, and there has been no leak since, it has also had a new battery and oil filter, and an oil change. MOT valid until 10/16. Only selling because I got a new car for work.;
