Reluctantly selling my Honda Civic as I've injured my back so need to get myself an automatic car. I have had my car for 7 years , it had one previous owner who bought it from new. I put on 4 new tyres at 79000 miles last year so they are all in very good condition. For the MOT in May I had to replace the track rod end and put on a new ABS sensor , it then passed with no advisories. The car has been extremely reliable. It has no dents and the bodywork is in excellent condition for its age , minor scuffs where luggage has been put into the boot. Serviced in May and MOT until May 2017.;
