Descriptions of CDJ-2000 NXS2: Improved sound design

For the best possible club sound, we've added a 96 kHz/24-bit sound card and improved the digital signal processing (DSP) and Digital Out. Analogue noise is reduced to a minimum by a high-performance 32-bit D/A converter and separate analogue power supply. Crisp high-resolution audio is supported for FLAC, Apple Lossless Audio (ALAC), as well as MP3, WAV, AAC, and AIFF.

Large touch screen

The 7-inch, full-colour touch screen gives you instinctive control of your favourite features. It displays all the info you need, including Wave Zoom, Needle Countdown, Phase Meter, and more. Keyword Search and Track Filter mode help you browse and select your tracks faster for an effortless performance.

8 Hot Cues

Set cue points in rekordbox and customise their colours. 2 banks of 4 colour-illuminated Hot Cues put instant playback of pre-set cue points at your fingertips.

Beat perfect

Quantize snaps cues and loops to the rekordbox beat grid for a reliable performance every time.

Add a DDJ-SP1

Add the DDJ-SP1 to your set-up and access even more performance features. Simply plug in a USB

cable and control up to 4 CDJ-2000NXS2s using Pro DJ Link.

CDJ-2000NXS2 Additional Features: For the best possible club sound, we've added a 96 kHz/24-bit sound card and improved the digital signal processing (DSP) and Digital Out. Analogue noise is reduced to a minimum by a high-performance 32-bit D/A converter and separate analogue power supply. Crisp high-resolution audio is supported for FLAC, Apple Lossless Audio (ALAC), as well as MP3, WAV, AAC, and AIFF. The shortcut button gives you direct access to Browse mode and My Settings on the player's touch display.

Three-position lever

Simply tap the three-position lever to engage Slip Reverse, Forward, and Reverse.

Memory Cue

Set, name and colour-code your cues in rekordbox, for example 'my breakdown', then access the information directly on the player's screen.

My Settings

Take your preferred settings with you wherever you play. Save your settings and tracks to USB, SD card, smartphone or tablet, connect to the hardware, and your settings load instantly along with your tracks.

Beat Jump

Use Quantized Beat Jump to jump 1 beat backwards or forwards from the current playback position.
