health, well looked after very healthy puppies. They all look very similar but are mainly black with few whiskers of brown and a little white on their chest. They are eating and drinking very well and are putting on weight nicely. They were on puppy mash at the beginning and now they are on hard food, meat and puppy milk. They have been wormed regularly had flea treatment and nails clipped. These puppies have been brought up in a healthy clean environment (indoors)..

The puppies are extremely friendly very playful and have had plenty of love from an early age. They are very chilled and cuddly when handled they all have great postures, correct bite, good noses which helps with their breathing and lovely coats.

These gorgeous pups will come with puppy pack you will get some vouchers to start you off...

The pups will be microchipped have all necessary KC pedigree paperwork would have had all vaccinations. Also flea, wormed and nails cut.

If you have any questions or your looking to view, or wish to secure a pup please do not hesitate to contact me i would prefer by phone. Thank you kind.
