Special Home needed for Sphynx kittens.

We have been advised the kittens may have come into contact with corona virus.

Corona virus is very common in cats, as many as one in every three cats come into contact with the virus at some point in their lives. Occasionally, in a very small percentage of cats (5%), the virus can lead to more serious problems in the first two years of life.

The kittens appear well and as long as they are fed a good quality diet there does not appear to be any problems.

The kittens will need to go to indoor homes only preferably with no other cats. The Sphynx Kittens are litter trained and ready to leave for their new homes. No offers.
