The amp is in good condition, although it has got a few bumps and bruises through all the good times we've had. There is a few scuffs down the left side of the amp and a small burn mark, see photos. The sound however is fantastic. It is meant for rock and metal, but it has such a diverse range of sounds it could be used for any style of music. I bought the amp about 5 years ago and it still sounds amazing. the reason I'm selling this is because I don't have enough room. spec: 75 Watt combo with new "Valve-Dynamic" power 1 x 12" Celestion Seventy 80 16-digital effects with independent level controls 2 channels w/3 modes Gain 1: Classic hi-gain Gain 2: Modern hi-gain Voicing and Contour controls.
